FINANCE AND COMMERCE.

Washinson, Thursday Evening, July 8.
In our District securities two of our best bonds, the Congress guaranteed 3-85's and the 8 per cent, greenbacks, have been weak during the past few days, with light transactions as the rule of the day—the former characterized by slight fluctuations; the latter by a downward course, notwithstanding the fact that the Commissioners are issuing the special tax assessments, which ought to create a Broily demand and an advance of prices. About half of these tax bills, representing upwards of \$1,000,000, have been issued, yielding a return to the District treasury of 10 per cent, as long as delinquents held off. It is evident that large loss of these two classes of bonds have been held by parties who could not await

cent. as long as delinquents hold off. It is evident that large lots of these two classes of bonds have been held by parties who could not await the slow course of improvement, thus injuring themselves and the entire market.

During the present week several large blocks of the guaranteed 2-50 have changed hands in a private way in New York and Washington, a slight reduction in rates inducing the activity, while the sales at the boards have been moderate considering the wild activity which prevailed about two months since; but the market is now beginning to assume a stronger under-current, and the prospects are that both demand and prices will improve. As we approach the time for the payment of the August interest, which will be prountly met, a desire of possession will naturally be created.

With a limited market and low and decilining rates for learnable funds, (the range being 1 to 4 per cent. Per annum for sale accommodations and time learns,) and a growing conditence in a realisation of the 3-55 by the slightest concession, and the willingness of bankers to receive them as collateral in the negotiation of lears, will tend to cause the wast amount of idle capital to seek investment, as the beads are now paying more than 5 per cent, at their present prices.

With the softening of the hard feeling against the District growing out of malledous representations and the honorable opinions of very high official and unofficial authorities as to the responsibility of the General Government, the bonds will be treated in every respect as Government securities.

The following were the rates at the Stock

The Wall street markets are much weaker than yesterday. There has been a sharp decline in gold, opening at 115%, closing at 116, with much fluctuation between the two rates.
